THE COLLEGE PHASE IS ONE OF THE MOST INTERESTING STAGE...

College is the place that allows students to dive deep into ocean of new beginning and possibilities. The college phase is one of the most interesting stages in life that gives me an opportunity to explore. Some happened with me when I joined this college. Teachers not only guide us on our academic pursuits but also helps in various others things. It is a beautiful and perfect blend of joy and hardships. I meet different people, interact with them, learn about their different cultures, and grow as a sensible human. One learns and understands how to talk to different people and judge their behaviour, thus helping me with important life skills. Third semester was filled with practical experience which help me to become a proficient teacher. I really like to thank all my teacher for giving their knowledge and making me an sensible human.
