**STEPPING TOWARDS ACADEMIC EXCELLENCE**

## VOICE OF ALUMNI

Regardless of other professional courses, the B Ed programme at the A S College of Education has the capacity to shape and develop student teachers' attitudes towards the ability to teach and plan extracurricular activities.

Students here are enthusiastic about doing their duties and taking part in the events, conferences, and other classroom activities that are planned and organised by college staff under the guidance of our principal.

Additionally, teachers serve as counsellors, offering crucial information during the course.

The college library is stocked with a broad variety of books, magazines, research papers, and other materials needed for a student to flourish academically.

Being a member of this outstanding institution has given me a deep sense of knowledge of student psychology and approaches to educating a young mind.

STEPPING TOWARDS ACADEMIC EXCELLENCE

## VOICE OF ALUMNI

**Prabhsimran Kaur** had completed my B.Ed in 2023 from A.S.College of education kalal majra,khanna. The B Ed. program pushes teacher candidates to reflect on their practices. I can say that I have got the opportunity to study varied subjects and do so many activities which I had never done before. I had the perception that B.Ed course would be much easier than what I had previously done. But I was proven wrong. The course had all new subjects, some of which I had previously no idea about. I had to study Psychology, Philosophy, Understanding Discipline, Language across the curriculum, School Organization and Management, Guidance and Counselling, Assessment in Learning and pedagogy subjects. They were very new but also very interesting. During the course, I got to participate in one act play,mime, installation and other co- curricular activities in the college. Independence Day celebration, Teacher's Day celebration and poster making competition were my personal favourite. I also participated in the skill in teaching competition and got first prize in the preparation of teaching aid of science. Through this course, I got to learn working in groups. For many assignments and workshops, we had to make groups and do the work accordingly.

It Is really one of the best Colleges. I couldn't have asked for more; the teachers were so helpful to me, whenever there was anything I needed or didn't understand they were always there without delay. They made me feel right at home. The facilities were just amazing and the place is homely.

It was possibly one of the best decisions of my life and I'm so grateful that I had the opportunity to learn. "I just want to thank you all for all your help extended to me and my classmates throughout the year. I can't express in words how much I appreciate it. It has been a wonderful year and I will certainly never forget it"
